

VOLUNTEER

2nd Iowa Breeding Bird Atlas

The Iowa Breeding Bird Atlas is a 5-year project (2008-2012) where volunteers visit specific areas throughout the state in order to record breeding statuses of birds. The Atlas' primary goal is to document Iowa's breeding birds and to evaluate how their distributions have changed since the first Atlas in 1985-90.

This volunteer is parked here because he/she may be surveying somewhere nearby.

Sponsored by:

Iowa Ornithologists'
Union

Iowa Department of
Natural Resources
